Fmoc-L-Gln(Trt)-Aib

Cat. No. CEGZ-6489

Lot. No. (See product label)

Introduction

Description	Fmoc-L-Gln(Trt)-Aib is an N-terminally Fmoc-protected dipeptide fragment with trityl protection on the glutamine side chain, supplied at 99% purity.
Applications	Solid-phase peptide synthesis Protected dipeptide fragment assembly Coupling and deprotection optimization Peptide process and analytical research

Product Information

Purity	99%
Structure	Fmoc- and trityl-protected dipeptide
Composition	Fmoc-L-Gln(Trt)-Aib
Function	Protected peptide synthesis intermediate
Grade	Peptide synthesis grade
Usage	For peptide synthesis and laboratory research.
