

Boc-(2S)-3-Cyano-2-Methyl-4-Oxopiperidine

Cat. No. CEGZ-6497

Lot. No. (See product label)

Introduction

Description

Boc-(2S)-3-Cyano-2-Methyl-4-Oxopiperidine is a stereodefined protected piperidine intermediate supplied at 99% purity.

Applications

Protected heterocycle synthesis Chiral intermediate development Coupling and functional-group transformation studies Identity and purity analysis

Product Information

Form	Solid
CAS No.	2212021-56-0
Chemical Name	tert-Butyl (2S)-3-cyano-2-methyl-4-oxopiperidine-1-carboxylate
Purity	99%
Structure	Boc-protected chiral piperidone derivative
Function	Organic synthesis intermediate
Grade	Research grade
Usage	For laboratory research only.
