

1-Allyl-5-Fluoro-L-Tryptophan

Cat. No. CEGZ-6503

Lot. No. (See product label)

Introduction

Description

1-Allyl-5-Fluoro-L-Tryptophan is a stereodefined substituted tryptophan derivative supplied at 99% purity.

Applications

Unnatural amino acid research Peptide building-block development Indole functionalization studies Identity and purity analysis

Product Information

Form

Solid

CAS No.

3067192-74-6

Chemical Name

(S)-3-(1-Allyl-5-fluoro-1H-indol-3-yl)-2-aminopropanoic acid

Purity

99%

Structure

Allyl- and fluoro-substituted L-tryptophan derivative

Function

Unnatural amino acid synthesis intermediate

Grade

Research grade

Usage

For peptide synthesis and laboratory research only.
