Nosyl-Protected Chloro-Azanyl Dipeptide Intermediate

Cat. No. CEGZ-6505

Lot. No. (See product label)

Introduction

Description	Nosyl-Protected Chloro-Azanyl Dipeptide Intermediate is a stereochemically defined amino acid coupling intermediate supplied at 99% purity.
Applications	Protected peptide synthesis research Protected amino acid coupling Selective deprotection studies Identity and purity analysis

Product Information

Form	Solid
Chemical Name	(R)-2-[(S)-2-(Chloro-15-azanyl)propanamido]-3-[(2-nitrophenyl)sulfonamido]propanoic acid
Purity	99%
Structure	Nosyl-protected chloro-azanyl dipeptide-like intermediate
Function	Protected peptide synthesis intermediate
Grade	Peptide synthesis grade
Usage	For peptide synthesis and laboratory research only.
