

Hydroxypinacolone Retinoate

Cat. No. CEGZ-6632

Lot. No. (See product label)

Introduction

Description

Hydroxypinacolone retinoate is an ester derivative of retinoic acid used in cosmetic research as a retinoid active ingredient.

Applications

Cosmetic and dermatological research; retinoid active for formulation development.

Product Information

Appearance

Yellow to orange crystalline solid or oil

CAS No.

893412-73-2

Molecular Formula

C₂₆H₃₈O₃

Molecular Weight

398.586

Purity

≥98%

Boiling Point

508.5±33.0 °C(Predicted)

Density

0.990±0.06 g/cm³(Predicted)

Grade

Research grade

Storage and Shipping Information

Storage

Store at -20°C, protected from light and air.
