tBuO-Ste-γ-Glu(AEEA-AEEA-OH)-OtBu

Cat. No. CEGZ-6667

Lot. No. (See product label)

Introduction

Description	tBuO-Ste-γ-Glu(AEEA-AEEA-OH)-OtBu is a tert-butyl-protected long-chain fatty acid–glutamate–AEEA conjugate used as an intermediate in organic synthesis, mainly in laboratory research and development and chemical production processes.
Applications	Organic synthesis intermediate Laboratory research and development Chemical production processes
Synonyms	tBuO-Ste-Glu(AEEA-AEEA-OH)-OtBu

Product Information

CAS No.	1118767-16-0
Molecular Formula	$C_{43}H_{79}N_3O_{13}$
Chemical Name	(S)-22-(tert-Butoxycarbonyl)-43,43-dimethyl-10,19,24,41-tetraoxo-3,6,12,15,42-pentaoxa-9,18,23-triazatetratetracontanoic acid
Molecular Weight	846.1
Purity	99%
Notes	For research and development use only.
