Creative Enzymes®

Trypsin

Cat. No. BIO-1011

Lot. No. (See product label)

Introduction

Description	[Source]: porcine pancreas (or bovine pancreas) [Molecular weight] :~23.3KDa [Structure features]: folding single-chain (alkalescence) [Nature]: As a protein enzyme, a type of serine proteases, specialized hydrolysis carboxyl terminal is peptide linkage of alkaline amino acid.
Applications	(1) Used to research, with polypeptide and protein to survey and evaluate sequence. (2) Bio-products tools enzyme, such as activation of the recombinant human insulin original, and so on. (3) Biochemical medicine bulk drug.
Synonyms	Trypsin; EGF
