Nα-Boc-L-histidine

Cat. No. CEGZ-6994

Lot. No. (See product label)

Introduction

Description	Nα-Boc-L-histidine is the Boc-protected form of the proteinogenic amino acid L-histidine, with a free imidazole side chain and a free carboxyl group. The Boc group is removed under acidic conditions.
Applications	Used as a building block and intermediate in peptide synthesis for the preparation of histidine-containing peptides and histidine derivatives.
Synonyms	Boc-histidine; N-tert-butoxycarbonyl-L-histidine

Product Information

CAS No.	17791-52-5
Molecular Formula	C11H17N3O4
Molecular Weight	255.27
Notes	For research and development use only.

Storage and Shipping Information

Storage	Store in a tightly closed container in a cool, dry place.
