Potassium Diformate

Cat. No. CEGZ-50230

Lot. No. (See product label)

Introduction

Description	Potassium diformate is the double salt of formic acid and potassium formate, supplied as a white crystalline powder with a sour taste that is easily soluble in water and decomposes at high temperature. The product has an assay of not less than 98.0%, with moisture of not more than 2.0%.
Applications	Used as an acidifying feed additive in livestock, poultry, and aquaculture diets to support feed hygiene and gut health.
Synonyms	Potassium hydrogen diformate; Formic acid potassium salt (2:1)

Product Information

Appearance	White crystalline powder
Form	Powder
CAS No.	20642-05-1
Molecular Formula	HCOOH·HCOOK
Molecular Weight	130.14
Purity	≥98.0%
Notes	For research and development use only.

Storage and Shipping Information

Storage	Store in a tightly closed container in a cool, dry place.
