

Lactobacillus/Mung Bean Seed Ferment Extract

Cat. No. CEGZ-50238

Lot. No. (See product label)

Introduction

Description

Lactobacillus/mung bean seed ferment extract is a cosmetic fermentation ingredient produced by lactic acid bacteria fermentation of mung bean together with soothing botanicals. Fermentation decomposes or converts potential irritants, making the ingredient gentle on skin. It is a pale yellow to yellow liquid with a total flavonoid content of not less than 0.2%.

Applications

Used as a soothing and repairing active in skin care formulations at a recommended addition level of 1%-5%; readily water soluble and can be added directly to the aqueous phase.

Synonyms

Lactobacillus/Phaseolus radiatus seed ferment extract
