

Lactobacillus Ferment Lysate

Cat. No. CEGZ-50240

Lot. No. (See product label)

Introduction

Description

Lactobacillus ferment lysate is a postbiotic cosmetic ingredient obtained by lysis of Lactobacillus culture, rich in bioactive molecules released from the bacterial cells. It is a light yellow to yellow liquid that helps balance the skin surface microflora and supports skin conditioning.

Applications

Used as a microbiome-balancing and skin-conditioning active in skin care formulations at a recommended addition level of 0.5%-100%; can be added before or after emulsification.

Synonyms

Lactobacillus ferment lysate filtrate; Lactobacillus lysate
