

LY2886721

Cat. No. CEI-0392

Lot. No. (See product label)

Introduction

Description LY2886721 is an oral, small molecule of beta-site amyloid protein cleaving enzyme (BACE) inhibitor with the potential to inhibit the synthesis of beta-amyloid and thereby to slow the clinical progression of AD.

Product Information

CAS No. 1262036-50-9

Molecular Formula C₁₈H₁₆F₂N₄O₂S

Molecular Weight 390.41

Purity >99%

Targets BACE

Solubility DMSO 9 mg/mL, Water

Storage and Shipping Information

Storage 2 years at -20 centigrade
