

Epirubicin Hydrochloride

Cat. No. CEI-0469

Lot. No. (See product label)

Introduction

Description Cell-permeable. An anthracycline antitumor antibiotic. A stereoisomer of doxorubicin that exhibits

reduced cardiotoxicity. Its antitumor actions are mediated by targeting topoisomerase II.

Synonyms 4'-epiadriamycin; 4'-epidoxorubicin

Product Information

Appearance Pale yellow solid

CAS No. 56390-09-1

Molecular

C27H29NO11 · HCl

Formula

Chemical (8S-cis)-10-((3-amino-2,3,6-trideoxy-β-L-arabino-hexopyranosyl)oxy-7,8,9,10-tetrahydro-6,8,11-

379.45

Name trihydroxy-8-(hydroxyacetyl)-1-methoxy-5,12-naphthacenedione hydrochloride;

Molecular

Weight

Purity >97% by HPLC

Targets TOP2A

Solubility DMSO

Storage and Shipping Information

Storage -20 centigrade

Shipping Gel pack
