

FK-506

Cat. No. CEI-0540

Lot. No. (See product label)

Introduction

Description A potent immunosuppresant and in vitro T cell proliferation blocker. It disrupts calcineurin-mediated

signal transduction in T-lymphocytes. It interacts with its FK506-binding protein-12 (FKBP-12), leading to increase in the release of sarcoplamic reticulum-derived calcium. FK506 and rapamycin, but not

cytosporin inhibit aldosterone-stimulated sodium transport in A6 cells.

Synonyms Tacrolimus

Product Information

Appearance White solid

CAS No. 104987-11-3

Molecular

C44H69NO12

Formula

Chemical Tacrolimus

Name

Molecular 805

Weight

Purity >98%

Targets immunosuppresant

Solubility DMSO (>1 mg/ml) and EtOH (>1 mg/ml)

Storage and Shipping Information

Storage -20 centigrade

Shipping Conditions Gel pack

Tel: 1-631-562-8517 1-516-512-3133
