

JM6

Cat. No. CEI-0551

Lot. No. (See product label)

Introduction

Description

Cell-permeable. A slow-release prodrug version of Ro 61-8048, an inhibitor of KMO (kynurenine 3-monooxygenase), the enzyme that controls the kynurenine pathway, long believed to be implicated in neurodegeneration. JM6 reverses and prevents symptoms of neurodegenerative diseases like Alzheimer's and Huntington's in animal models. JM6 does not penetrate into the brain, but works by inhibiting KMO in the blood.

Product Information

Appearance	Liquid
CAS No.	1008119-83-2
Molecular Formula	C ₂₃ H ₂₆ N ₄ O ₆ S ₂
Chemical Name	2-(3,4-Dimethoxybenzenesulfonylamino)-4-(3-Nitrophenyl)-5-(Piperidin-1-yl)Methylthiazole
Molecular Weight	696.7
Purity	>95% by HPLC
Targets	KMO

Storage and Shipping Information

Storage	-20 centigrade
Shipping Conditions	Gel pack
