

# **Cellobiase for Alcohol Fermentation (Food Grade)**

Cat. No. ASE-003

Lot. No. (See product label)

#### Introduction

**Description** Cellobiase is an enzyme which can hydrolyze the substrate with β- glucosidic bond. It can be used in the

alcohol fermentation. It can hydrolyze the  $\beta$ -D-glucosidic bond of reducing end, which the acquisitions

are isomalto-oligosaccharide, sugar ester, glycopeptide and etc.

**Synonyms** Cellobiase; enzyme for alcohol fermentation; Cellobiase for Alcohol Fermentation

#### **Product Information**

**Form** Liquid

*CAS No.* 9033-06-1

Activity 5,000u/ml

pH Stability 3.5-7.0

**Optimum pH** 4.5-5.0

**Optimum** 30-60°C, favorable at 50°C

temperature

Unit 1 unit of Cellobiase equals to the amount of enzyme required to hydrolyze salicin per minute to produce

**Definition** 1 μmol of reducing sugar (in terms of glucose) at 50°C and pH4.8.

### **Usage and Packaging**

Package 25kgs/bag, 1.125kgs/bag

## Storage and Shipping Information

**Storage** Should be stored in a cool place avoiding high temperature. Powder: 12 months at 25°C, activity remain

>90%. Increase dosage after shelf life.
