

## α-Glucuronidase from Opitutus terrae PB90-1, Recombinant

Cat. No. NATE-1179

Lot. No. (See product label)

## Introduction

**Description** In enzymology, an alpha-glucuronidase (EC 3.2.1.139) is an enzyme that catalyzes

the chemical reaction: an alpha-D-glucuronoside + H2O ↔ an alcohol + D-glucuronate. Thus, the two substrates of this enzyme are alpha-D-glucuronoside and H2O, whereas its two products are alcohol and D-glucuronate. This enzyme belongs to the family of hydrolases, to be specific those glycosidases that

hydrolyse O- and S-glycosyl compounds. The systematic name of this enzyme class is alpha-D-glucosiduronate glucuronohydrolase. This enzyme is also called alpha-

glucosiduronase.

**Synonyms** EC 3.2.1.139; alpha-D-glucosiduronate glucuronohydrolase; alpha-glucosiduronase

## **Product Information**

**Source** Opitutus terrae PB90-1

**Form** Supplied in 3.2 M ammonium sulphate

**EC Number** EC 3.2.1.139

*CAS No.* 37259-81-7

**Molecular Weight** 82809.8 Da

**Purity** > 95 % as judged by SDS-PAGE

Activity 21.12 U/mg

**Concentration** 31.04 U/mL

Unit Definition One unit is defined as the amount of enzyme required to release 1µmol of D-

glucose equivalents per minute from an aldouronic acid mixture.

1/1

## Storage and Shipping Information

**Storage** Store at 4°C (shipped at room temperature)

**Tel:** 1-631-562-8517 1-516-512-3133 **Email:** info@creative-enzymes.com
