

Isoamylase from Escherichia coli, Recombinant

Cat. No. NATE-1212

Lot. No. (See product label)

Introduction

Description Isoamylase is an enzyme with system name glycogen 6-alpha-D-glucanohydrolase. This enzyme catalyses the following chemical reaction:Hydrolysis of (1->6)-alpha-D-glucosidic branch linkages in glycogen, amylopectin and their beta-limit dextrans. This enzyme also readily hydrolyses amylopectin.

Synonyms EC 3.2.1.68; debranching enzyme; glycogen alpha-1,6-glucanohydrolase; isoamylase

Product Information

Source Escherichia coli str. K-12 substr. W3110

Form Supplied in 3.2 M ammonium sulphate

EC Number EC 3.2.1.68

CAS No. 9067-73-6

Molecular Weight 77396.8 Da

Purity > 95 % as judged by SDS-PAGE

Usage and Packaging

Preparation Agitate vial sufficiently to fully homogenise enzyme precipitate before use.

Instructions

Storage and Shipping Information

Storage Store at 4°C (shipped at room temperature)
