

Fludarabine Phosphate (Fludara)

Cat. No. CEI-1339

Lot. No. (See product label)

Introduction

Description Fludarabine is an inhibitor of STAT1 activation and a DNA synthesis.

Synonyms Fludara

Product Information

CAS No. 75607-67-9

Molecular Formula C₁₀H₁₃FN₅O₇P

Chemical Name [(2R,3S,4S,5R)-5-(6-amino-2-fluoropurin-9-yl)-3,4-dihydroxyoxolan-2-yl]methyl dihydrogen phosphate

Molecular Weight 365.21

Purity 98.00%

Targets DNA synthesis

Solubility Soluble in DMSO > 10 mM

Storage and Shipping Information

Storage Store at -20°C

Shipping Conditions Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request
