HIV-1 integrase inhibitor 2

Cat. No. CEI-1362

Lot. No. (See product label)

Introduction

Description	HIV-1 integrase inhibitor 2 is an inhibitor of HIV-1 integrase used in the treatment of human immunodeficiency virus (HIV) infection

Product Information

CAS No.	957890-42-5
Molecular Formula	C21H20ClNO2
Chemical Name	2-(6-chloro-2-methyl-4-phenylquinolin-3-yl)pentanoic acid
Molecular Weight	353.84
Purity	98.00%
Targets	HIV-1
Solubility	Soluble in DMSO

Storage and Shipping Information

Storage	Store at -20°C
Shipping Conditions	Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request
