INCB024360 analogue

Cat. No. CEI-1369

Lot. No. (See product label)

Introduction

Description	INCB024360 analogue is a potent and selective IDO1 inhibitor.
Synonyms	INCB-024360; INCB 024360; INCB-24360; indoleamine-2,3-dioxygenase inhibitor INCB024360

Product Information

CAS No.	914471-09-3
Molecular Formula	C9H7ClFN5O2
Chemical Name	4-[(3-chloro-4-fluoroanilino)-nitrosomethylidene]-1,2,5-oxadiazol-3-amine
Molecular Weight	271.64
Purity	98.06%
Targets	IDO1
IC50	67 nM
Solubility	Soluble in DMSO > 10 mM

Storage and Shipping Information

Storage	Store at -20°C
Shipping Conditions	Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request
