

INCB024360 analogue

Cat. No. CEI-1369

Lot. No. (See product label)

Introduction

Description INCB024360 analogue is a potent and selective IDO1 inhibitor.

Synonyms INCB-024360; INCB 024360; INCB-24360; indoleamine-2,3-dioxygenase inhibitor INCB024360

Product Information

CAS No. 914471-09-3

Molecular Formula C₉H₇ClFN₅O₂

Chemical Name 4-[(3-chloro-4-fluoroanilino)-nitrosomethylidene]-1,2,5-oxadiazol-3-amine

Molecular Weight 271.64

Purity 0.9806

Targets IDO1

IC₅₀ 67 nM

Solubility Soluble in DMSO > 10 mM

Storage and Shipping Information

Storage Store at -20°C

Shipping Conditions Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request
