

IRAK inhibitor 4

Cat. No. CEI-1376

Lot. No. (See product label)

Introduction

Description IRAK inhibitor 4 is an inhibitor of interleukin-1 receptor-associated kinase.

Product Information

CAS No. 1012104-68-5

Molecular Formula C33H35F3N6O3

Chemical Name 1-(4-hydroxycyclohexyl)-N-(3-methylbutyl)-2-[[5-[2-(trifluoromethoxy)phenyl]-1H-indazol-3-yl]amino]benzimidazole-5-carboxamide

Molecular Weight 620.66

Purity 98.00%

Targets IRAK

Solubility Soluble in DMSO

Storage and Shipping Information

Storage Store at -20°C

Shipping Conditions Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request
