

## Nutlin-3a chiral

Cat. No. CEI-1447

Lot. No. (See product label)

### Introduction

**Description** Nutlin-3 is a small-molecule inhibitor of mouse double minute 2 (MDM2) with IC50 value of 0.09  $\mu$ M.

**Synonyms** Nutlin-3a; Nutlin 3a

### Product Information

**CAS No.** 675576-98-4

**Molecular Formula** C30H30Cl2N4O4

**Chemical Name** 4-[(4S,5R)-4,5-bis(4-chlorophenyl)-2-(4-methoxy-2-propan-2-yloxyphenyl)-4,5-dihydroimidazole-1-carbonyl]piperazin-2-one

**Molecular Weight** 581.49

**Purity** 0.9711

**Targets** MDM2

**IC50** 0.09  $\mu$ M

**Solubility** Soluble in DMSO > 10 mM

### Storage and Shipping Information

**Storage** Store at -20°C

**Shipping Conditions** Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request
