

BCIP/NBT-Blue Liquid Substrate System for Membranes

Cat. No. CSUB-0055

Lot. No. (See product label)

Introduction

Applications

A ready-to-use buffered alkaline phosphatase substrate for use in immunoblotting. Produces an insoluble dark blue-purple end product. Not recommended for microwell (e.g., ELISA) or immunohistochemical applications.

Synonyms

5-Bromo-4-chloro-3-indolyl phosphate/nitro blue tetrazolium liquid substrate system

Product Information

Substrates

Alkaline Phosphatase

Storage and Shipping Information

Storage

2-8°C
