

L-Asp-Asp-Rhodamine trifluoroacetate salt

Cat. No. CSUB-0112

Lot. No. (See product label)

Introduction

Applications Substrate for detection of intracellular caspase activation by flow cytometry after apoptosis induction in intact hematopoietic cell lines.

Synonyms (L-Asp)₂ Rhodamine 110 - TFA

Product Information

Form solid

Molecular Formula C₂₈H₂₄N₄O₉ · C₂HF₃O₂

Molecular Weight 674.53

Amino Acid Sequence Asp-Asp-Rh

Substrates Caspase (general)

Storage and Shipping Information

Storage -20°C
