

Kininogen, low molecular weight from human plasma

Cat. No. CSUB-0328

Lot. No. (See product label)

Introduction

Applications

Kininogen, low molecular weight from human plasma has been used to study rMASP-1 (recombinant mannose-binding lectin-associated serine protease 1)-mediated cleavage of LK (low molecular weight kininogen). It has been used as a standard for protein identification in milk-proteomics study.

Synonyms

LMW kininogen

Product Information

Form

lyophilized powder

Substrates

Kallikrein

Storage and Shipping Information

Storage

-20°C

Shipping Conditions

dry ice
