Creative Enzymes®

Firefly tails (lanterns), desiccated

Cat. No. CSUB-0361

Lot. No. (See product label)

Introduction

Applications	Fireflies have been used in several studies of bioluminescence. In particular they may be used in assays to determine toxicity pathways because bioluminescence can quantitatively measure a wide range of biological activities.

Product Information

Substrates	Luciferase

Storage and Shipping Information

Storage	-20°C
