

MMP-2/MMP-9 Substrate I, Fluorogenic

Cat. No. CSUB-0491

Lot. No. (See product label)

Introduction

Synonyms Gelatinase A/Gelatinase B Substrate I; DNP-PLGMWSR

Product Information

Form Yellow solid

Formulation Supplied as a trifluoroacetate salt.

Purity >95% by HPLC

Toxicity Standard Handling

Substrates Protease

Excitation max. ~280 nm

Emission max. ~360 nm

Primary target A fluorogenic substrate for both human fibroblast gelatinase (HFG; MMP-2) and human neutrophil gelatinase (HNG; MMP-9).

Storage and Shipping Information

Storage -20C

Shipping Conditions ambient
