Azocasein

Cat. No. CSUB-0517

Lot. No. (See product label)

Introduction

Applications	Azocasein is a nonspecific protease substrate. Hydrolysis of the casein releases the azo dye into the media where it is detected by absorbance at 440 nm.Azocasein is an inflammatory agent that is used to induce amyloid A amylooidosis in experimental animals.
Synonyms	Sulfanilamide-azocasein

Product Information

CAS No.	102110-74-7
Substrates	Protease

Storage and Shipping Information

Storage	2-8°C
