Pefachrome Try

Cat. No. CSUB-0595

Lot. No. (See product label)

Introduction

Applications	Pefachrome substrates are used for chromogenic assays of various serine proteinases. Pefachrome Try is used for the detection of serine proteases such as trypsin.
Synonyms	Bz-Val-Gly-Arg-4-nitroanilide acetate; N-Benzoyl-L-valyl-glycyl-L-arginine-4-nitroanilide acetate

Product Information

CAS No.	161572-28-7
Molecular Formula	C26H34N8O6 · C2H4O2
Molecular Weight	614.65
Substrates	Trypsin Substrates

Storage and Shipping Information

Storage	2-8°C
