

## Microorganism blend for Denitrification Treatment in Waste Water

Cat. No. WME-2710

Lot. No. (See product label)

### Introduction

<b>Description</b>	WME-2710 contains various selected microorganisms, is our superior product specially applied in waste water treatment and bioremediation. It is suitable to aerobic treatment system and can be widely used in wastewater treatment of urban domestic, slaughterhouse, coking, tannery, and waste leachate, etc.
<b>Applications</b>	It is significantly effective in the process of ammonia nitrogen removal of sewage treatment facilities, crashed system recovery, and improving the handling ability to nitrification system in cold seasons.
<b>Synonyms</b>	Product for Denitrification Treatment in Waste Water

### Product Information

<b>Form</b>	Tan liquid
<b>Contaminants</b>	Bacteria Count: $1 \times 10^9$ /g
<b>pH Stability</b>	6.0 - 8.0
<b>Optimum pH</b>	7
<b>Thermal stability</b>	10°C -45°C
<b>Optimum temperature</b>	20°C - 30°C
