

Bovine Collagen powder

Cat. No. COL-0200

Lot. No. (See product label)

Introduction

Description Bovine collagen is a naturally occurring protein that is found in the skin, bones, and muscles of cows. This collagen is so similar to human collagen that many people in the beauty industry have embraced its use as a cost-effective way to treat wrinkles and fine lines. Acting as a replacement to human collagen, it can be used to fill fine lines and correct scars.
