

## **Factor Xa Chromogenic Substrate 2**

Cat. No. CSUB-0619

Lot. No. (See product label)

## Introduction

**Description** Chromogenic substrates are peptides that react with proteolytic enzymes under the formation of color.

They are made synthetically and are designed to possess a selectivity similar to that of the natural substrate for the enzyme. Attached to the peptide part of the chromogenic substrate is a chemical group which when released after the enzyme cleavage gives rise to color. The color change can be

followed spectrophotometrically and is proportional to the proteolytic activity.

**Applications** For research applications. Chromogenic substrate for Factor Xa.

**Synonyms** Chromogenic Substrate for Factor Xa; Chromogenic Substrate; Factor Xa Chromogenic Substrate

## **Product Information**

**Form** Lyophizied powder

Molecular C34H52N10O10, HCl

Formula

Molecular 760.9 Da

Weight

**Purity** > 95%

 ${\it Concentration}$  about 33  $\mu {\it Moles/vial}$ 

*Solubility* >= 5 mg/mL in H2O

**Substrates** Factor Xa

## Storage and Shipping Information

**Storage** 2-8°C

**Stability** Lyophilized product: 30 months at 2-8°C. Reconstituted product: 7 days at room temperature (18-

25°C); 3 months at 2-8 °C. Do not freeze
