

4-(Trifluoromethyl)umbelliferyl-β-D-glucopyranoside

Cat. No. CSUB-0661 Lot. No. (See product label)

| Introduction | |
|----------------------------------|--|
| Description | 4-(Trifluoromethyl)umbelliferyl-β-D-glucopyranoside is a convenient substrate for determining β-glucosidase for diagnostic purposes. |
| Applications | A convenient substrate for determining β -glucosidase for diagnostic purposes |
| Product Information | |
| Form | Solid |
| CAS No. | 116981-86-3 |
| Molecular Formula | C16H15F3O8 |
| Molecular Weight | 392.28 |
| Melting Point | >220° C |
| Solubility | Soluble in DMF, and DMSO. |
| Substrates | Trypsin-like enzymes |
| Storage and Shipping Information | |
| Storage | Store at 4° C |
