

## 7-Ethoxy-4-(trifluoromethyl)coumarin

Cat. No. CSUB-0723

Lot. No. (See product label)

## Introduction

**Description** 7-Ethoxy-4-(trifluoromethyl)coumarin is a fluorogenic substrate used for

determining cytochrome P450 activity.

**Applications** A fluorogenic substrate

**Synonyms** Ethyl 4-(trifluoromethyl)umbelliferyl ether

## **Product Information**

**Form** Solid

**CAS No.** 115453-82-2

Molecular Formula C12H9F3O3

Molecular Weight 258.19

Substrates Cytochrome P450 (CYP)1A1; CYP2B4; CYP2B6

## Storage and Shipping Information

**Storage** Store at -20° C

**Tel:** 1-631-562-8517 1-516-512-3133 **Email:** info@creative-enzymes.com
