

## 7-Methoxy-4-(trifluoromethyl)coumarin

Cat. No. CSUB-0730 Lot. No. (See product label)

| Introduction                     |   |
|----------------------------------|---|
| Description                      | 7-Methoxy-4-(trifluoromethyl)coumarin is used in higer-throughput in vitro metabolism assays. |
| Applications                     | A biochemical for proteomics research   |
| Synonyms                         | Methyl 4-(trifluoromethyl)umbelliferyl ether  |
| Product Information              |   |
| Form                             | Solid   |
| CAS No.                          | 575-04-2  |
| Molecular Formula                | C11H7F3O3   |
| Molecular Weight                 | 244.17  |
| Solubility                       | soluble in acetone  |
| Substrates                       | 3β-Hydroxysteroid Dehydrogenase   |
| Storage and Shipping Information |   |
| Storage                          | Store at room temperature   |
