

8-Hydroxyquinoline- β -D-glucuronic acid, sodium salt

Cat. No. CSUB-0737

Lot. No. (See product label)

Introduction

Description

8-Hydroxyquinoline- β -D-glucuronic acid, sodium salt is a substrate used in the detection of β -D-glucuronidase and E/ coli. It yields a brown precipitate upon cleavage.

Applications

A substrate used in the detection of β -D-glucuronidase and E. coli

Product Information

Form

Solid

CAS No.

207728-71-0

Molecular Formula

C₁₅H₁₄NaNO₇

Molecular Weight

343.27

Solubility

Soluble in water

Substrates

D-aminoacylase(s); amidohydrolase(s)

Storage and Shipping Information

Storage

Store at -20° C
