

## Arachidonoyl-AMC

Cat. No. CSUB-0752

Lot. No. (See product label)

### Introduction

#### Description

Arachidonoyl-AMC is a fluorogenic substrate for fatty acid amide hydrolase (FAAH). This substrate is the basis for a simple, selective and sensitive assay for FAAH which is amenable to high-throughput screening.

#### Applications

A fluorogenic substrate for fatty acid amide hydrolase (FAAH)

#### Synonyms

AAMCA

### Product Information

#### Form

Solid

#### CAS No.

862913-13-1

#### Molecular Formula

C<sub>30</sub>H<sub>39</sub>NO<sub>3</sub>

#### Molecular Weight

461.6

#### Substrates

Kinase; ERK 2; JNK1; Cdc2

### Storage and Shipping Information

#### Storage

Store at -80° C
