

## Arachidonoyl-AMC

Cat. No. CSUB-0752

Lot. No. (See product label)

### Introduction

**Description** Arachidonoyl-AMC is a fluorogenic substrate for fatty acid amide hydrolase (FAAH). This substrate is the basis for a simple, selective and sensitive assay for FAAH which is amenable to high-throughput screening.

**Applications** A fluorogenic substrate for fatty acid amide hydrolase (FAAH)

**Synonyms** AAMCA

### Product Information

**Form** Solid

**CAS No.** 862913-13-1

**Molecular  
Formula** C<sub>30</sub>H<sub>39</sub>NO<sub>3</sub>

**Molecular  
Weight** 461.6

**Substrates** Kinase; ERK 2; JNK1; Cdc2

### Storage and Shipping Information

**Storage** Store at -80° C
