Creative Enzymes®

Neutral cellulase for Fabric

Cat. No. TEXT-1930

Lot. No. (See product label)

Introduction

Description	Neutral cellulase is a kind of polishing enzyme for color retention. It is the latest production for neutral bio-polishing which helps the fabric get the best effect on color retention.
Applications	Neutral cellulase can be used for the fabrics bio-polishing. Be suitable for woven fabric or knitting fabric. The use of neutral cellulase is various, after the enzyme treatment, it can achieve the following effects: 1. Clean the fuzz and yarn end; 2. Good color retention and low fading level; 3. With bright color and lustrous; 4. With low fabric strength damage and keeping high tear resistance. Especially the effects of 2 and 4 can not be reached by the traditional enzyme preparations.

Product Information

Appearance	liquid
CAS No.	9012-54-8

Usage and Packaging

Package	25kg/barrel or subject to client requirement.
