

Native Human Lactate Dehydrogenase 1

Cat. No. NATE-0385

Lot. No. (See product label)

Introduction

Description A lactate dehydrogenase (LDH or LD) is an enzyme found in nearly all living cells

(animals, plants, and prokaryotes). LDH catalyzes the conversion of pyruvate to lactate and back, as it converts NADH to NAD+ and back. A dehydrogenase is an

enzyme that transfers a hydride from one molecule to another.

Applications Research Clinical Chemistry Life Science

Synonyms EC 1.1.1.27; 9001-60-9; lactate dehydrogenase; LDH; LD; (S)-Lactate:NAD+

oxidoreductase, L-LDH; LAD; L-Lactic Dehydrogenase; lactic acid dehydrogenase; L (+)-nLDH; L-(+)-lactate dehydrogenase; L-lactic acid dehydrogenase; lactate

dehydrogenase NAD-dependent; lactic dehydrogenase; NAD-lactate dehydrogenase

1/1

Product Information

Species Human

Source Human Erythrocytes

EC Number EC 1.1.1.27

CAS No. 9001-60-9

Activity > 250 U/mL

Buffer Ammonium sulfate suspension

Storage and Shipping Information

Storage 4°C

Tel: 1-631-562-8517 1-516-512-3133 **Email:** info@creative-enzymes.com
