Passion Flower Extract

Cat. No. EXTC-008

Lot. No. (See product label)

Introduction

Description	Passion flower extract is prepared from passiflora caerulea, a species of flowering plant native to South America. Passion flower extract targets the central nervous system and works to ease tension and prevent twitching in the muscles. This calming effect of passion flower extract flavon does not affect brain function or respiratory rate, which is therefore much safer than medications with sedative effects.
