Ginkgo Biloba Extract

Cat. No. EXTC-009

Lot. No. (See product label)

Introduction

Description	Ginkgo biloba extract is prepared from the leaves of Maidenhair Tree after Adiantum, which is a unique species of tree with no close living relatives. Ginkgo biloba leaf extract is used for the treatment of numerous conditions, many of which are under scientific investigation. The most powerful effect of ginkgo biloba extract is on the circulating system. Ginkgo biloba extract can be used to treat respiratory problems such as asthma and bronchitis.
Applications	Ginkgo biloba extract is widely used in nutraceuticals, pharmaceuticals and cosmetics for its multiple health benefits, especially in cardiovascular health, cognitive enhancement and anti-aging.
