

## Euglena powder

Cat. No. EXTC-165

Lot. No. (See product label)

### Introduction

#### Description

Euglena has a green, spindle-shaped form, about 50µm long and 10µm wide, with a blunt front end and a pointed back end. It has a cytostome at the front of the organism, and a large, round nucleus located in the middle to rear part of the cell body. When alive, it is transparent. The surface is covered with an elastic, diagonally striped pellicle. Euglena is also a highly adaptable organism that can survive under harsh environmental conditions. It contains a well-balanced array of 59 essential nutrients for the human body, capable of comprehensively supplementing the nutrients needed by the human body, alleviating hidden hunger, and providing a high content of easily absorbed vitamins, minerals, amino acids, unsaturated fatty acids, Euglena polysaccharides, chlorophyll, lutein, zeaxanthin, GABA, etc., making it an efficient natural dietary nutritional supplement. Euglena polysaccharides are unique to the genus Euglena and can account for 50 to 85% of their dry weight. Euglena lacks a cell wall, with an absorption rate as high as 93.1%, and contains all the amino acids required by the human body, similar to breast milk, with an absorption rate that is considered the best among algae.

#### Applications

- 1.Remove the bad cholesterol,heavy metal
- 2.Reduce blood press,blood fat
- 3.Treatment of gout bone disease

### Product Information

**Form** Green powder

**Purity** 100%

### Storage and Shipping Information

**Storage** Tightly sealed and stored in cool and dry environment to protect from light, heat and oxygen.
