Bilberry Extract

Cat. No. EXTC-173

Lot. No. (See product label)

Introduction

Description	Bilberries are basically the European version of the American blueberry. Bilberries are grown in Europe, Canada and the U. S. and extracts of the ripe berry are known to contain flavonoid pigments known as anthocyanins - which act as powerful antioxidants. Blueberries are flowering plants of the genus vaccinum with dark-blue berries. They are picked up from wild bushes which are free of pollution. Bilberries are rich in anthocyanosides, proanthocyanidins, resveratrol, flavors and tannins inhibit mechanisms of cancer cell development and inflammation.
Applications	Functional food, drinks, health care products.

Product Information

Appearance	Purple red powder
Purity	Anthocyanidins 25%, Anthocyanosides36%
Function	1. Anti-oxident 2. Enhance the immune system ability. 3. Reduce heart disease and stroke occurred. 4. Help to prevent various free radicals related diseases. 5. Reduce the number of cold and shorten the duration. 6. Enhance flexibility of arteries and veins and blood capillary. 7. Relaxation vascular so as to promote the blood flow and the high blood pressure.
