Boswellia Serrata Extract

Cat. No. EXTC-175

Lot. No. (See product label)

Introduction

Description	Boswellia is a genus of trees in the order Sapindales, known for their fragrant resin which has many pharmacological uses, particularly as anti-inflammatories.

Product Information

Appearance	Brown powder
Purity	10:1, 20:1, Boswellic acid40% 50% 65%
Function	Boswellia has long been used in Ayurvedic medicine. Recently, the boswellic acids that are a component of the resin it produces have shown some promise as a treatment for asthma and various inflammatory conditions. In West Africa, the bark of Boswellia dalzielii is used to treat fever, rheumatism and gastrointestinal problems. Boswellia incense may even relieve depression.
