

Echinacea extract

Cat. No. EXTC-180

Lot. No. (See product label)

Introduction

Applications Pharmaceutical, Functional food, Water-soluble beverages, Health products.

Product Information

Source	Echinacea is the most popular native American therapeutic herb. It is best known for boosting immune function. It seems to work by helping white blood cells and lymphocytes to protect the body against invading organisms. Unlike antibiotics, which are directly lethal to bacteria, echinacea makes immune cells more efficient in attacking bacteria, viruses and abnormal cells. Unlike a shot, which is active only against a specific problem, echinacea stimulates the overall activity of the cells responsible for fighting all kinds of infection.
Appearance	Brown powder
Purity	Polyphenols 4%(UV), Chicoric Acid 2%-4%(HPLC)
Function	1. Anti-virus, anti-fungal, anti-tumor and anti-inflammatory; 2. Strengthening the immune system to prevent influenza and reduce the risk of colds; 3. Adjuvant treatment for arthritis, skin disease or wound healing; 4. Relieving toothache, burns
