

## Alkaline Protease for detergent

Cat. No. DETE-2623

Lot. No. (See product label)

### Introduction

**Description** Protease is a kind of enzyme preparation produced by one microbes submerged fermentation. It is also a kind of modified enzyme preparation after DNA recombination. As a common used enzyme preparation in detergent industry, the main activated composition alkaline protease can rapidly decompose protein. Protease can hydrolyze the hardly soluble protein on fabric into soluble peptide chain and amino acid in detergent solution. smoothness. Therefore, after the washing with cellulase, white clothes will be whiter and color clothes will be brighter and softer. At the same time, it can get off the granular dirt in the fiber.

**Applications** Protease can effectively remove sweat stain, blood stains, food protein dirt, cream stain and etc, the detergent contains protease will make fabric get perfect effect after washing.

**Synonyms** Alkaline Protease; for detergent; Protease; decompose protein; Detergent Enzymes; Detergents; Alkaline Protease for detergent; DETE-2623

### Product Information

**Appearance** powder or liquid

**CAS No.** 9001-92-7

### Usage and Packaging

**Package** 25kg/paper barrel (powder form), 30kg/polyster barrel (liquid form).
