

Effective Solutions for Enzyme Stabilization

Stabilizing unstable enzymes can be challenging. Creative Enzymes provides services for enzyme stabilization and formulation, and products including enzyme protectant & stabilizer to help researchers keep their enzymes stable during long-term storage.

Enzyme Protectant & Stabilizer

Catalog	Product Name	Catalog	Product Name	Catalog	Product Name
PPCD-001	Substrates stabilizer PPCD	HPC-001	Enzyme protectant HP	ADP-001	Enzyme protectant ADP
SHE-050	Stabilizer HE-050	AFP-001	Enzyme protectant AFP	CCD-001	Substrate stabilizer CCD
TYC-001	Protein protectant TY	GHC-001	Protein protectant GH	AEP-002	Protein protectant AEP-HBC
DPD-001	Enzyme stabilizer DPD	HPD-001	Protein protectant HPD	AES-001	Enzyme stabilizer AES

Enzyme Stabilization and Formulation Services

Creative Enzymes offers the whole package of services to address enzyme stability issues ranging from stabilization, stability tests, to formulation development. We ensure that the developed products are safe and of high efficacy and quality, regardless of the purity, identity, or quantity of the starting samples.

Features

- Cutting edge facilities & innovative techniques.
- A wide range of enzyme formulations, from liquid and various forms of solid products to immobilized enzymes.
- Capable of fast development and scale-up of virtually any new formulation and process.
- Formulation solutions for all volumes (grams – 100 kg).
- A wide array of analytical tools for characterization and troubleshooting.

Creative Enzymes also provides other enzyme products and services in addition to the listed above. Please [contact us](#) for any needs.
